

Making Waste Matter

HomeBiogas presents the two flag products for Off-Grid living

HomeBiogas system

With HomeBiogas, you can turn organic waste into a valuable resource, producing clean cooking gas for your off-grid household and liquid Bio-fertilizer for your garden. It's a win-win situation that helps you save money while doing your part for the planet.

Converts organic waste into clean energy

Minimal maintenance & totally off-grid

Easy to install & comes in a variety of sizes

With HomeBiogas, we're properly disposing of waste, we're creating fuel to cook with and we're creating fertilizer to grow the food that we eat.

HomeBiogas Bio-Toilet

The Bio-Toilet offers fresh and comfortable bathroom experience of indoor living while sustaining a greater commitment to a green lifestyle. Inspired by the simple science of nature, HomeBiogas Bio-Toilet is a self-contained unit that transforms human waste into usable resources.

Operates without connection to a sewage system

Converts human waste into clean energy

Odor free and mess free

When people think about off-grid, it could be very grungy, we wanted to make it like a regular bathroom, that works the same way but has a positive effect on the environment. With HomeBiogas we get to make our toilet as guest friendly and clean as possible.
